## **The Ou Project- Field Work and Statistics for Ecological Projects**

by Neil Chambers and Phil Parker

This guide was written for the Open University science course Ecology, but it will be valuable to anyone planning field work. Its emphasis is on how to design fieldwork to facilitate the eventual statistical analysis of the data. A large section of the book was written to dispel the mystique surrounding statistical procedures, the bane of biological field workers. Illus. B. & w, Field Studies Council, 1986.
